

Nord Security was born as a passion project, and our drive is reflected in our work, which has earned high praise from major tech outlets and cybersecurity experts. We want one thing only — to give true online privacy and security to as many people as we can.

At the moment, we have 5 leading cybersecurity products trusted by over 15 million users worldwide.

## OUR PRODUCTS:

The fastest VPN on the planet

Advanced VPN solutions for teams

A password manager designed with the user in mind

A powerful end-to-end encryption tool for safely storing and sharing files

The definitive collection of tools, know-how, and infrastructure for building your own VPN products

## OUR VALUES:

-  **Serve through technology.** Technology should serve people, not the other way around. We build tools to make you feel safe and free on the internet.
-  **Treasure trust.** Your trust means the world to us. Respect for our users' data is ingrained in every process at Nord Security.
-  **Focus on what's real.** Technology brings danger as well as progress. We aim to make security accessible to people who don't really do technology.
-  **Put privacy first.** Your privacy is king. We design privacy and security solutions with zero-knowledge infrastructure, so your details are safe with us.

## SCOPE OF EXPERTISE:

- Cybersecurity markets
- Cloud security
- Encryption
- Secure hosting
- Online privacy
- Password security
- Digital literacy
- Corporate network security
