

Cooperation partnership signed between CCI France Lithuania and the CCI France Mauritius

The CCI France Mauritius has signed a cooperation agreement with the CCI France Lithuania, for the benefit of their respective member companies, in order to facilitate their economic, entrepreneurial and cultural development.

After the meeting of the two Presidents, a partnership agreement was signed in order to exchange between the members of the two Chambers and to develop cross-border projects between Mauritius and Lithuania, based in particular on the values of the network of the French Chambers of Commerce and Industry (CCI FI), which brings together 125 chambers of commerce and industry in 95 countries.

This agreement takes the form of four pillars. Indeed, under the terms of this partnership, members of one of the CCIs traveling the country of the other CCI will be given a personalized welcome and will be able to access the latter's events under the same conditions, notably financial, as for local members. In addition, when a webinar is organized on a topic that may be of interest to members of both CCI's, the organizing CCI will invite the other CCI to invite its own members. Finally, this partnership provides for an office to be made available free of charge when a member of one CCI visits the country of the other CCI.

All these benefits are reserved for the respective members of the CCI of Mauritius and Lithuania.
